

PANCHMURA MAHAVIDYALAYA
DEPARTMENT OF CHEMISTRY
Programme Outcome, Programme Specific Outcome and Course Outcome
For B.Sc. Honours (CBCS Pattern) in Chemistry
2018-2019

Department of Chemistry		After successful completion of three year degree program in Chemistry a student should be able to;
PO	Programme Outcomes	Description
PO 1	Sound domain knowledge	Acquiring sound knowledge of chemical concepts and emerging issues in chemical science.
PO 2	Academic and Scientific Endeavour	To help the students in developing academic and scientific endeavour by fostering and nurturing the young talent for proper scientific pursuit.
PO 3	Creative and Practical Ability to analyse and deal with data	Analysis of experimental data and their representation in the form of graphs and plots. Use of statistics as a means to express complicated chemical data.
PO 4	Familiarity with Recent Developments in a Particular Field	Should be able to apply modern theories and approaches to explain all spatial phenomena and relate nature with human inter relations
PO 5	Environmental Awareness	Impact of environmental changes on human and how it can be explained at a global and regional perspective.
PO 6	Laboratory Skill	The students are exposed to modern equipments in the Laboratory where they get hands-on training which help them to succeed at any entry-level position in chemical industry.
PSO	Programme Specific Outcomes	Description
PSO 1	Critical appreciation of the Subject.	Acquiring sound knowledge on the fundamentals of Physico-chemical concepts and applying them in practical and professional situations.
	Academic and	

PSO 2	Scientific Endeavour.	To help the students in developing, Cultivating and demonstrating the art of science learning and teaching by fostering and nurturing the young talent for proper scientific pursuit.
PSO 3	Scientific Attitude	Developing the right scientific temper compatible with creative impulse.
PSO 4	Technical Skill Development	Creating updated knowledge on research methodology and developing skills in the application oriented Chemistry.
PSO 5	Environmental Consciousness	Impact of environmental changes on human and its reflection on society.
PSO 6	Communication Skill	Classroom discussions, student seminar ,written assignments, debates etc. help students to develop effective communication skill which will aid them to enhance employability.
PSO 7	Personality Development	Personality development skills are likely to help students in their professional and personal lives thus making them responsible and sincere citizens of the society.
PSO 8	Spirit of Team Work	Encouraging students to co-ordinate with one another in a team environment rather than trying to excel individually.
PSO 9	Basic Human Values	Study of various texts and mutual interaction among the students inside and outside the class room help the learners to understand human behavioural science.

Course Outcomes B. ScChemistry (Honours Semester-I)

Course	Outcomes
	After completion of these courses students should be able
CC-1 Organic Chemistry I	CO-1. To learn about bonding and physical properties of organic molecules CO-2. To learn general treatment of reaction mechanism CO-3. To learn stereochemistry of organic molecules CO-4. To learn separation techniques, determination of boiling point and identification of organic compounds
CC-2 Physical Chemistry I	CO-5. To learn properties and behaviors of gaseous state CO-6. To learn chemical thermodynamics and its application CO-7. To learn kinetics of chemical reactions CO-8. To study kinetics of chemical reactions experimentally and determination of pH and solubility product

Course Outcomes B. Sc Chemistry (Honours Semester-II)

Course	Outcomes
	After completion of these courses students should be able
CC-3 Inorganic Chemistry-I	CO-9. To learn about extranuclear structures of atoms CO-10. To learn chemical periodicity CO-11. To learn about acid base reactions, redox reactions and precipitation reactions CO-12. To learn redox titrations (experimentally)
CC-4 Organic Chemistry-II	CO-13. To learn stereochemistry of organic molecules CO-14. To learn general treatment of reaction mechanism

	CO-15. To learn substitution and elimination reactions in organic chemistry CO-16. To prepare organic compounds, purify them and to determine melting point
<u>Course Outcomes B. Sc Chemistry (Honours Semester-III)</u>	
Course	Outcomes After completion of these courses students should be able
CC-5 Physical Chemistry-II	CO-17. To learn about transport process CO-18. To learn application of thermodynamics in chemistry CO-19. To learn about basic quantum mechanics CO-20. To determine viscosity, partition coefficient, equilibrium constant and to perform conductometric experiments
CC-6 Inorganic Chemistry-II	CO-21. To learn chemical bonding CO-22. To learn radioactivity and nuclear structure CO-23. To learn about iodometric and iodimetric titration experimentally
CC-7 Organic Chemistry-III	CO-24. To learn about chemistry of alkenes and alkynes CO-25. To learn aromatic substitutions CO-26. To learn about carbonyl compounds and organometallic reagents CO-27. To detect special elements and functional groups in organic compounds and to prepare suitable derivatives
SEC-1 Basic Analytical Chemistry	CO-28. To learn about Composition of soil, Concept of pH and pH measurement, Complexometric titrations, Chelation, Chelating agents, use of indicators CO-29. To learn about Definition of pure water, sources responsible for contaminating water, water sampling methods, water purification methods. CO-30. To learn about Nutritional value of foods, idea about food processing and food preservations and adulteration. CO-31A. To learn about Column, ion-exchange chromatography etc. CO-31B. To learn about Analysis of cosmetics and Major and minor constituents and their function
<u>Course Outcomes B. Sc Chemistry (Honours Semester-IV)</u>	
Course	Outcomes After completion of these courses students should be able
CC-8 Physical Chemistry-III	CO-32. To learn application of thermodynamics II in chemistry CO-33. To learn about Electrical Properties of molecules CO-34. To learn about Quantum Chemistry CO-35. To determine ions and in neutral electrolyte (using common indicator); Potentiometric titration of Mohr's salt

	<p>solution against standard $K_2Cr_2O_7$ solution: Determination of K_{sp} for $AgCl$ by potentiometric titration of $AgNO_3$ solution against standard KCl solution: Effect of ionic strength on the rate of Persulphate – Iodide reaction; Study of phenol-water phase diagram; pH-metric titration of acid (mono- and di-basic) against strong base</p>
CC-9 Inorganic Chemistry	<p>CO-36. To learn about general principle of metallurgy CO-37. To learn about chemistry of s and p block elements and also on inorganic polymers CO-3. To learn about basic coordination chemistry CO-38. To studies complexometric titration and inorganic preparation of complex salts</p>
CC-10 Organic Chemistry	<p>CO-39. To studies about nitrogen compounds and various types of name reactions CO-40 To know about the rearrangement reaction and stereochemical features of aliphatic and aromatic compounds CO-41. To studies retrosynthesis analysis, ring synthesis, asymmetric synthesis CO-42. To learn about UV, IR and NMR spectroscopy CO-43 To learn about the estimation of organic compounds experimentally</p>
SEC-2 Pharmaceutical Chemistry	<p>CO-44. To learn about pharmaceuticals chemistry including drugs CO-45. To study about fermentation</p>

Course Outcomes B. Sc Chemistry (Honours Semester-V)

Course	Outcomes
	After completion of these courses students should be able
CC-11 Inorganic Chemistry IV	<p>CO-46. To learn about VBT and CFT, magnetic, colour properties of coordination compounds CO-47. To study coordination chemistry CO-48. To have idea about 3d, 4d and 5d elements in term of electronic configuration, oxidation states, redox properties, coordination chemistry. CO-49A. To learn about the chemistry of transitions metal and lanthanoids and actinoids CO-49B. To learn about Chromatography of metal ions; Gravimetry and Spectrophotometry.</p>
CC-12 Organic Chemistry V	<p>CO-50. To learn about heterocyclic compounds and poly nuclear aromatic compounds CO-51. To study about alicyclic compounds CO-52 To understand about pericyclic reactions CO-53. To know about the amino acids and proteins CO-54A. To learn about nucleic acids CO-54B. To learn about Chromatographic Separations and Spectroscopic Analysis of Organic Compounds.</p>
DSE-1 Advanced Physical Chemistry	<p>CO-55. To learn about Crystal Structure CO-56. To learn about statistical thermodynamics CO-57. To study about Specific heat of solid, 3rd law and Adiabatic demagnetization</p>

	CO-58. To know about Computer Programming based on numerical methods
DSE-2 Green Chemistry	CO-59. To know about the principles of Green Chemistry and Designing a chemical synthesis CO-60. To study some examples of Green Synthesis/ Reactions CO-61A. To learn about Future Trends in Green Chemistry CO-61B. Principles of Green Chemistry and Designing a Chemical synthesis ; Future Trends in Green Chemistry.

**Programme Outcome, Programme Specific Outcome and Course Outcome
For B.Sc. Generic and Programme Courses (CBCS Pattern) in Chemistry
2018-2019**

Department of Chemistry	After successful completion of three year degree program in Chemistry a student should be able to;	
PO	Programme Outcomes	Description
PO 1	Sound domain knowledge	Acquiring sound knowledge of chemical concepts and emerging issues in chemical science.

<u>Course Outcomes B. Sc. Chemistry Generic Elective and Programme (Semester-I)</u>		
Course	Outcomes	
	After completion of these courses students should be able	
Course	Outcomes	
	After completion of these courses students should be able	
<u>Course Outcomes B. Sc Chemistry Generic Elective and Programme (Semester-III)</u>		
Course	Outcomes	
	After completion of these courses students should be able	
GE-3 /C-1C	CO-17. To learn about chemical thermodynamics and its application	

	<p>CO-18. To learn equilibrium for chemical reactions CO-19. To learn about equilibrium in ionic solutions CO-20. To learn aromatic hydrocarbon CO-21. To learn about organometallic compounds CO-22. To learn about aryl halides CO-23. To study about alcohols, phenols, ethers and carbonyl compounds CO-24. To learn about Thermochemistry and Conductance. CO-25. To identify pure organic compounds</p>
SEC-1 Basic Analytical Chemistry (Only for Programme)	<p>CO-26. To learn about fundamental mathematical procedure and their applications in chemistry CO-27. To learn computer programming for statistical analysis CO-28. To handle numeric data Co-29. To learn about application of basic analytical procedures in chemistry</p>
<u>Course Outcomes B. Sc Chemistry Generic Elective and Programme (Semester-IV)</u>	
Course	Outcomes After completion of these courses students should be able
GE-4 /CC-1D	<p>CO-30. To learn about the Carboxylic Acids and Their Derivatives CO-31. To study about Amines and Diazonium Salts CO-32. To learn amino acids CO-33 To learn about aromatic nitro compounds. CO-34. To learn carbohydrate chemistry CO-35. To learn about general group trends in periodic table CO-36. To study Lanthanides and actinides CO-37. To learn Coordination chemistry CO-38. To study about Industrial chemistry CO-39. To study Error Analysis and Computer Applications</p>
SEC-2 Pharmaceutical Chemistry	<p>CO-40. To learn about pharmaceuticals chemistry including drugs. CO-41. To study about fermentation and Preparation of Aspirin and its analysis Preparation of magnesium bisilicate (Antacid).</p>
<u>Course Outcomes B. Sc Chemistry Programme (Semester-V)</u>	
DSE-1A Green Chemistry	<p>CO-42. To know about the principles of Green Chemistry and Designing a chemical synthesis CO-43. To study some examples of Green Synthesis/ Reactions CO-44. To learn about Future Trends in Green Chemistry</p>
SEC-3	<p>CO-45. To know about Uncertainty in experimental techniques and measurement. CO-46. To study Algebraic operations, Differential calculus and Numerical integration. CO-47. To know about basics of Computer programming CO-48. Acquire Practical Knowledge on Handling numeric data, Numeric modelling and statistical analysis.</p>
