

PANCHMURA MAHAVIDYALAYA

ANNUAL REPORT

2020-2021

Panchmura Mahavidyalaya is the first rural degree college and fourth undergraduate college in Bankura district established in 1965. It was named after the place Panchmura which is renowned for its terracotta crafts not only in the district of Bankura but also in India.

The College is the manifestation of long-cherished dream of the locality to bring the light of higher education to the cottages of marginal farmers, land labourers and the poor. Long-sighted vision of the local educationists like Dr. Ratnakar Mandal, Shri M. K. Mukherjee (founder President of the GB), Shri C. B. Sannigrahi and Shri S. Banerjee (1st founder Principal) was transformed into reality under the benevolent leadership of Dr. Pasupati Mandal (the then MP). The generous families of the villages of Joypur and Kulbani donated considerable tracts of land on which the college was founded. Basic initial infrastructure was built with the hard-earned collective contributions and untiring efforts of the local people most of who are peasants. However, the classes of the College were started in the premises of Panchmura High School on 20th August, 1965 for three-year General Degree Courses and University Entrance courses in Arts. In 1968, the College was shifted to its own premises in the newly-constructed buildings. Setting off its enlightened journey with limited resources and infrastructure, the College has been steadily augmenting its infrastructure and resources for offering contemporary undergraduate courses in Arts, Commerce and Science. Because of the suitable courses and programmes delivered by energetic and experienced professors and teachers, adequate infrastructure and facilities, and active and cooperative office staff, the

College was accredited with B grade (1st cycle of accreditation) in 2007 and B+ grade (2nd cycle of accreditation) by NAAC in 2016.

Brief History of Panchmura Mahavidyalaya

Far from the maddening crowd's ignoble strife and in the lap of pristine, green nature, there beckons the abode of learning - Panchmura

Mahavidyalaya, established in 1965, is the first rural degree college and third undergraduate college in Bankura. It was named after the place Panchmura which is renowned for its terracotta crafts not only in the district of Bankura but also in India. The College is the manifestation of long-cherished dream of the locality to bring the light of higher education to the cottages of marginal farmers, land labourers and the poor. Long-sighted vision of the local educationists like Dr. Ratnakar Mandal, Shri M. K. Mukherjee (founder President of the GB), Shri C. B. Sannigrahi and Shri S. Banerjee (1st founder Principal) was transformed into reality under the benevolent leadership of Dr. Pasupati Mandal (the then MP). The generous families of the villages of Joypur and Kulbani donated considerable tracts of land on which the college was founded. Basic initial infrastructure was built with the hard earned collective contributions and untiring efforts of the local people most of whom are peasants. However, the classes of the College were started in the premises of Panchmura High School on 20th August, 1965 for three year General Degree Courses and University Entrance courses in Arts. In 1968, the College was shifted to its own premises in the newly-constructed buildings

About the Web-saṅgosthī:

The Vedas are eternal and the Vedic literature is the fountain of Indian culture and all the philosophical and literary texts which came later. Even during the modern times, when there has been a tremendous development in the field of science and technology, the importance of the Vedic study cannot be ignored.

The Vedic Literature hold that the life of an individual plays an important role in the economic, social, cultural and political well-being of the nation. The Vedic Literature do not prohibit a person from acquiring wealth, but they emphatically say that human beings should think that all wealth comes from God.

The modern science has developed electricity, aeronautics and so on. It pays more interest in physical world. The Vedic Literature, on the other hand, approach cosmic consciousness through physical consciousness. One can find the concepts of physics, electronics, biology, zoology and other sciences in the Vedic Literature through the Descriptions of the nature of various deities like Agni. The role of Vedic deities is not restricted to creation alone, but extends to the preservation of orderliness in the world. Certain observances are to be followed to maintain the orderliness. These observances are called *dharma* in the Vedas. The Vedas declare that by following the *dharma* or the observances, the society gets benefited. One can also derive benefits by pleasing the deities through prayers and sacrifices.

Everyone thinks of unifying this world which is divided due to languages, habits, politics and other considerations. Serious efforts are being undertaken in this regard. The Vedic Literature also emphasize the same. The *AV. (Atharva Veda)* Says that-

जनं विभ्रती बहुधा विवाचसं नानाधर्माणं पृथिवी यथीकसम् ।
सहसं धारा द्रविणस्य मे दुहां ध्रुवेव धेनुरनपस्फुरन्ती II 12.1.45.

The earth surrounded by water is only one. The farmers, merchants and others derive innumerable things from this earth. The earth gives equal benefits to everyone without any distinction.

Society consists of individuals. Hence the domestic life also plays an important role in society. Husband-wife relationship and well-being of the family should be given due importance. The Vedas rightly lay emphasis on this aspect and declare that men and women have equal responsibilities. They have to perform sacrifices as ordained in the Vedas. Lord Krishna says in the Geeta-

अन्नाद् भवन्ति भूतानि पर्जन्यादन्नसम्भवः ।
यज्ञाद् भवति पर्जन्यो यज्ञः कर्मसमुद्भवः II 3.14

That only through sacrifices rains shower; only through rain, the plants and trees yield fruits; this results in good economy and merchant class also benefits from this. The Vedas also recommend the rich merchant to give charity to the needy and the destitute. The instructions given by the Vedas with regard to the social and economical well-being of the society made Maxmuller to wonder and say, that what is not found in other texts are expressed in the Vedas. This was possible since the Vedic went through deep contemplation and uttered what they realized through intuition.

The Vedic Literature also instruct us the ways and means to be adopted in politics, administration and other relative subjects for the smooth functioning of the society. Since the Vedic Literature contain innumerable instructions that would benefit all, it is not possible to bring out all the information in this paper and only few examples are given here. So, we intend to explore the vast and varied relevance of the wisdom contained in the Vedic Literature through the proposed webinar.
